EVALUATION PROCESS AND CRITERIA

As part of the administrative evaluation, Liberties reserves the right to verify information and documents submitted by applicants, with authorized providers of such services.

The administrative and eligibility compliance check will be conducted by Liberties staff, and only the applications that will pass this check will be provided to the evaluators for assessment. The assessment of the applications performed by the evaluators will be used by Liberties in the process of selecting the best proposals.

Before the commencement of the evaluation procedure, the evaluators should have become acquainted with the Guidelines for Applicants for the respective Call, and the guidelines for evaluation that Liberties will provide to them.

The evaluators shall provide an unbiased assessment of the substance of the project's applications evaluated. They will provide scores for each application evaluated. Based on the scores assigned to each application form, Liberties will be able to identify the best applications that will be considered for funding. Each evaluator shall fill in and sign a detailed evaluation grid for each application proposal evaluated. They must provide a comment for each subsection of the evaluation grid and a summary of the assessments, including comments on the strengths and weaknesses of each full application.

Each application must be assessed on its own merits and not by comparing different applications. Evaluators are expected to bring their own experience of the sector and project implementation in the evaluation of each proposal.

The evaluators shall perform their tasks fairly and impartially, adhering to the rules on impartiality, confidentiality, and prevention of conflict of interest.

The evaluators are bound by a Declaration of Impartiality and Confidentiality to be signed before starting the assessment. If an evaluator believes there might be a situation of conflict of interests concerning one or more applicants, they must inform the contracting authority immediately.

Also, strict confidentiality is required from the evaluators involved in the implementation of this contract, notably on the assessments of individual applications.

The application will be evaluated against criteria set below. The evaluation will be conducted by three independent evaluators with proven knowledge and record of the region and fundamental rights issues.

The application will receive an overall score out of 50 maximum points using the breakdown in the evaluation grid below.

The evaluation criteria are divided into headings and subheadings. Each subheading will be given a score between 1 and 5 as follows: 1 = very poor; 2 = poor; 3 = adequate; 4 = good; 5 = very good.
